

BioPack

by **ifb**

BioPack IFB FSS is the perfect solution for packaging products, both in VFFS and HFFS. Combination of cellulose and biopolymers allows to create structures with different barrier properties against oxygen, moisture, etc... This is how your company and IFB contribute to creating a more sustainable world.

MAIN CHARACTERISTICS

Exceptional optical properties
Excellent transparency and brightness
Great mechanical performance
Perfect twist
High perforation resistance
Perfect sealing from 80 degrees Celsius

Optimal protection of the product to be packaged
Extends product life
Proper oxygen barrier
Excellent moisture transmission
Great barrier to fats and oils

OPTION

Configurable coil length, diameter and weight
Micro and macro perforation
Code printing / Code promotion
